THE SCIENCE BEHIND THE NEWS; the GAMMA series of **The Royal Society of New Zealand** is produced to bring you accurate, up-to-the-minute information on science issues in the news. Future issues are obtainable on subscription which will bring you such information as soon as possible after news items appear. Annual subscription is \$25.00, payable to The Royal Society of New Zealand, P O Box 598, Wellington. Fax (04) 473 1841. Email: sales@rsnz.org Other issues in the GAMMA series are:

- Pb or not Pb - lead in petrol
- Genetically modified food
- Mad Cow bites man
- Rabbit Calicivirus
- The invasion of the moths
- Hello Dolly - unforgettable ewe
- Superbugs
- Cell phone towers and health
- Vaccinations
- El Niño
- Mercury fillings
- Sun, skin and cancer
- Cosmic collisions
- Asian tiger mosquito
- Water, water everywhere
- Asthma
- Tattoos and body piercing
- Diabetes
- Arthritis - move it or lose it!
- Drugs in sport
- Genetically modified food 2
- Genetic technology in health
- Environmental aspects of genetic engineering
- Genetic engineering off the field
- Genetic engineering and ethics
- Foot and mouth disease
- The promise of stem cell research
- How now mad cow
- Food labelling
- Organic food
- Anthrax
- Weight of the world - Obesity
- Eating disorders
- 1080 - who's taking the bait?
- Meningococcal disease - it's a killer
- Smallpox
- SARS - the early days
- Biological weapons
- Malaria

The Royal Society of New Zealand is an independent, national academy of sciences, a federation of some 60 scientific and technological societies, and individual members. It promotes a critical awareness of science and technology in schools, in industry and in society. It administers several funds for science and technology, publishes seven journals, offers science advice to government, and fosters international scientific contact and co-operation
