

Erratum

Garnock-Jones, P. J.; Bayly, M. J.; Lee, W. G.; Rance, B. D. 2000: *Hebe arganthera* (Scrophulariaceae), a new species from calcareous outcrops in Fiordland, New Zealand. *New Zealand Journal of Botany* 38: 379-388.

The key to *Hebe* in Fiordland (p. 385) has a numbering error for which the authors apologise. As it stands, the key lead in couplet 5 for species with a sinus leads to a group of species that don't have a sinus, and *vice versa*.

We provide the couplet in its corrected form below:

- | | |
|---|---|
| 5 Leaf bud without a conspicuous sinus at base | 6 |
| Leaf bud with a conspicuous sinus at base (e.g., Fig. 5K, P, V) | 7 |
